Portfolio : Anita Kainth | Aspiring AI & ML Engineer | GitHub: <https://github.com/anitakainth1>

OBJECTIVE

Aspiring tech professional with an interest in Artificial Intelligence, Machine Learning, and Deep Learning. Looking for a tech role to apply my skills and learn by working on real-world projects. Motivated to grow in a dynamic environment and contribute to impactful solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++

Machine Learning & AI: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation

Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), Transfer Learning, Transformers, Image Classification, LangGraph, LLMs

Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, WordCloud

Data & Analytics: Data Preprocessing, Data Cleaning, Exploratory Data Analysis (EDA), Web Scraping

Web Development: HTML, CSS, Bootstrap, JavaScript (DOM Manipulation)

Databases: MySQL, MongoDB

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Linux, Tableau, Power BI

SOFT SKILLS

Problem-Solving | Time Management | Learning Agility | Leadership | Quick Learning | Team Collaboration | Innovation

EXPERIENCE

Technical Trainer (Intern)

AISECT | Dec 2025 – Mar 2026

- Conducted training sessions and interactive classes as part of internship responsibilities
- Delivered structured sessions on assigned technical modules and learning content
- Participated in organized training activities under the internship program

PROJECTS

Conversational AI Chatbot | LangGraph, LangChain, Groq, Gradio, Python

- Developed a conversational AI chatbot using LangGraph and Groq-powered Large Language Models (LLMs) for context-aware, multi-turn conversations.
- Designed stateful workflows using LangGraph to manage conversation flow and response generation.
- Implemented persistence-based chat history storage to retain conversation context across interactions.
- Integrated LLM capabilities for natural language understanding and intelligent response generation.

Pneumonia Detection using Chest X-Ray | CNN, TensorFlow, OpenCV

- Built a CNN-based deep learning model for pneumonia detection using chest X-ray images
- Performed image preprocessing and data augmentation for better model training
- Implemented the project using TensorFlow and Keras for medical image classification
- Applied deep learning techniques to improve disease detection accuracy

CERTIFICATIONS

- Completed certification in Data Analytics from Novitech
- Learned core Machine Learning concepts through Alison
- Completed Java Programming course from Udemy
- Gained Python 3 programming knowledge through Lernoiox
- Learned Tableau Data Visualization techniques from Great Learning
- Explored Multiagent Systems through IBM SkillsBuild
- Completed JavaScript Programming certification from Lernoiox

EDUCATION

Lamrin Tech Skills University, Ropar, Punjab – B.Tech in AI & ML 2023

MBG Public Senior Secondary School Pojewal - Senior Secondary Education
